#### About Us:

Asakura Robinson is a planning, urban design, and landscape architecture firm which strengthens environments and positively impacts communities through innovation, engagement, stewardship, and an integrated design process. Our employees are leaders in social and environmental design. As a firm, we strive to assist visionary clients to spur positive change. We focus on engaging communities in ever more diverse project contexts while maintaining a high level of creativity and collaboration in every endeavor.

Our studio is located in a growing urban neighborhood next to downtown, close to transit. As a small office that is joined together by our common beliefs and philosophy, we encourage our staff to be actively engaged with the community, serve on boards, committees, etc. With offices in Houston, Austin, New Orleans and Minneapolis, we emphasize collaboration between studios and disciplines, with a focus on industry best practices and innovation.

We are seeking planning students to join our team, who enjoy working in a fast-paced, creative environment. The planning intern is a full-time 12 to 16 week position working closely with Asakura Robinson's planning staff on a number of planning processes.

Plans currently under development include small area and neighborhood plans, housing, economic development and policy planning, active transportation and transit plans, and parks and urban ecology planning. These positions require a high level of professional attitude and the intern will be engaging directly with clients both locally and nationally.

Internships are paid. Stipend will be dependent on experience and will be negotiated following a successful application.

#### Skills Required:

- Current Masters or Bachelor students in urban planning, and/or design (experience with Landscape Architecture is a bonus, but not required)
- Excellent communication and organizational skills
- Strong visual communication skills and graphic talent
- Knowledge of GIS, Adobe Creative Suite and Sketchup
- Understanding of urban design principles and theory associated with project design and execution
- Ability to work well under pressure with tight deadlines
