

Burk-Kleinpeter, Inc., an engineering, planning and environmental firm, is seeking a Transportation Planner for its New Orleans, LA office. Typical work assignments could include corridor plans and evaluations, transit service analysis, traffic impact studies as well as traffic data development and collection. Work would include independent assignments as well as collaborating with other professionals within the firm or under contract with BKI. Travel may also be required as we currently have offices in Louisiana, Mississippi, and Alabama.

Ideal candidates must be motivated, manage multiple projects and deadlines, be comfortable working regularly with analysis software and have a willingness to learn software platforms currently used as part of the normal production of studies and analyses. Candidates must have a bachelor's degree in urban and regional planning, public administration, landscape architecture or compatible field, minimum 3 years of general planning experience, preferably in the field of transportation and AICP status either as an AICP Candidate or AICP member. A master's degree in urban and regional planning and/or transportation is preferred and could substitute for up to 1 year of professional experience.

Competitive salary & benefits package includes, 401(k) plan, health insurance, paid holidays and vacation, sick leave, & 4½ day work week.

Please send resumes via email to hr@bkiusa.com. Application deadline is June 30, 2019.
